work.shashankgaur@gmail.com ⋄ [LinkedIn](#) ⋄ [GitHub](#)

With **above 4 years** of experience, I build **scalable**, **high-performance** web applications. I translate Figma designs into responsive interfaces using TypeScript, React, and Tailwind CSS. I am a strong collaborator focused on **innovation**, **continuous improvement**, and delivering a **seamless** user experience.

EXPERIENCE

Senior Software Engineer   Apr 2024 - present
Dezerv investments pvt. ltd.   *Bangalore, India*

- Solved inefficiencies caused by inaccessible RM leave data by ingesting and transforming it from a third-party system, enabling internal services to consume it and improving overall RM efficiency.
- Solved the user attribution for the company particularly for the marketing team by creating a data store in snowflake after monitoring complete user journey.
- Resolved SEO indexing issues caused by 302 redirects on critical pages by developing an AWS Lambda function to enforce 301 redirects from non-slash to slash-ending URLs, ensuring proper Google bot indexing and improved page visibility.
- Successfully migrated SEO modules from Gatsby to Next.js, ensuring a seamless transition and maintaining SEO rankings along with core web-vitals.

Frontend Engineer   Dec 2021 - Mar 2024
Drip Capital   *Mumbai, India*

- Built Drip's onboarding portal with a complete underwriting journey from scratch.
- Implemented a component library using storybook and improved tree-shaking config for the component library to more than 50 percent of the bundle size.
- Created a modular architecture for different access roles given to customers for various actions that can be performed on the legacy application.
- Built a business portal for Drip using NextJS which was kind of a social media platform for organisations to connect with each other.

Fullstack Engineer   Apr 2021 - Dec 2021
Arvolution   *Mexico city*

- Build a mobile application to handle the logistics for a major retail store chain in the Mexico region.
- Took complete ownership and led a team to build the merchandise exchange feature.
